

EP310 PON Power Meter

Key Benefits

- Simultaneously verifies the power levels of all PON wavelengths (1310 nm, 1490nm, and 1550nm)
- Pass/fail analysis helps user quickly interpret results and ensures consistent PON turn-up
- Green light/red light LED helps user easily identify pass/fail results
- Rugged unit is water- and shock-resistant

The EP310 is a passive optical network (PON) power meter that enables users to quickly validate PON network installations. It measures 3 EPON wavelengths (1310/1490/1550 nm) at once, with user-defined limits and USB data transfer to simplify interpretation.
